Note from the Programme Chair:

Welcome to the 58th annual conference of the Canadian Economics Association.

You will already know that the conference hosts a large number of research sessions in all areas of Economics, as well as numerous special lectures--annual events such as the Innis Lecture, CWEC and Purvis lunches and the Presidential Address, state of the art lectures, and a number of other invited lectures including a special lecture to celebrate the 50th anniversary of Canadian Public Policy. This year there will be over 1000 presentations, in person and online. What may be less well known is that the conference is hosting a variety of other professional events, including the Embrace Day lecture and associated activities devoted to inclusiveness in the profession, and professional development activities (such as mentoring, graduate student posters, media training from specialists with the Bank of Canada, sessions on crucial conversations in the workplace, working with confidential data and design of research projects for replicability). I hope that you will be able to enjoy and benefit from the wide variety of both research and professional development sessions that have been contributed.

Organizing a conference of this scale requires financial support, and I want to thank the Association's many sponsors, including a number of individual departments and organizations listed in this program, and in particular Analysis Group and the Bank of Canada, which have been generous long-term supporters.

It also requires a great deal of meticulous practical work, none of which fell to me. Among many others, I especially want to mention Richard Chisik and Brennan Thompson of Toronto Metropolitan University's Economics department, who managed the many decisions involved with the conference site, room bookings, reception venues and numerous other details, aided by Sabrina Lin. As in many past years, our (now) Executive Officer, Paula Emery, organization, ensuring that the innumerable

things that need to be considered have indeed been considered and handled; Jack Madison, Denise Abella and Sartaj Dale have given indispensable assistance. This year however has been an especially challenging year for administration of the conference, with a transition to new conference software (which we hope you have found to be an advance), and the resignation of our longtime executive director, Sonya Marion.

The burden of these simultaneous transitions has been handled by Paula, who took on the oversight and management of the entire range of both normal organization and additional tasks associated with the changes, with Jack's highly capable help with all technical and software matters. It is very much appreciated.

Best wishes,

John Galbraith, McGill University
Vice-President

Mot du responsable du programme :

Bienvenue au 58e Congrès annuel de l'Association canadienne d'économique.

Vous savez déjà que le congrès accueille un grand nombre de séances de recherche dans tous les secteurs de l'économie, ainsi que de nombreuses présentations spéciales – des activités annuelles comme la conférence Innis, les dîners CWEC et Purvis et le discours présidentiel, d'éminents conférenciers et un certain nombre d'autres conférenciers, y compris une conférence spéciale pour célébrer le 50e anniversaire de la revue Analyse de politiques. Cette année, il y aura plus de 1 000 présentations, en personne et en ligne. Ce que l'on sait peut-être moins, c'est que le congrès accueille une série d'autres activités professionnelles, notamment la conférence de la journée « Embrace » et les activités connexes consacrées à l'inclusion dans la profession, ainsi que des activités de perfectionnement professionnel (dont le mentorat, les affiches d'étudiants des cycles supérieurs, une formation médiatique donnée par des spécialistes de la

Banque du Canada, des séances sur les conversations cruciales en milieu de travail, le traitement des données confidentielles et la conception de projets de recherche en vue de leur reproductibilité). J'espère que vous pourrez profiter de la grande variété de séances de recherche et de perfectionnement professionnel qui ont été proposées.

L'organisation d'un congrès de cette envergure nécessite une aide financière, et je tiens à remercier les nombreux commanditaires de l'Association, y compris différents départements universitaires et organismes énumérés dans le programme, et tout particulièrement Analysis Group et la Banque du Canada, deux commanditaires généreux et de longue date.

Un congrès de la sorte exige également des efforts pratiques méticuleux, aucun qui ne relevait de moi. Je tiens à mentionner, parmi tant d'autres, Richard Chisik et Brennan Thompson du département d'économie de l'Université métropolitaine de Toronto, qui ont géré les nombreuses décisions entourant le site du congrès, la réservation des salles, les salles de réception et de nombreux autres détails, avec l'aide de Sabrina Lin. Comme les années précédentes, notre (nouvelle) cadre de direction, Paula Emery, a assumé la responsabilité générale de l'organisation du congrès, veillant à ce que les innombrables éléments à retenir soient effectivement analysés et traités; Jack Madison, Denise Abella et Sartaj Dale ont aussi apporté une aide indispensable. Cette année s'est cependant avérée particulièrement difficile pour l'administration du congrès, en raison de la transition vers un nouveau logiciel de congrès (nous espérons que vous y avez vu une amélioration) et la démission de notre directrice exécutive de longue date, Sonya Marion.

C'est Paula qui a assumé le fardeau de ces transitions simultanées, assurant la supervision et la gestion de l'ensemble des tâches normales d'organisation ainsi que les tâches supplémentaires liées aux changements. Elle a été épaulée admirablement par Jack pour toutes les questions techniques et logicielles. Ces efforts sont très appréciés.

Bon congrès!

Vice-président

Welcome Message from the President and Vice-Chancellor of Toronto Metropolitan University:

I am delighted to welcome you to the 58th Annual Canadian Economics Association Conference. Toronto Metropolitan University and the Faculty of Arts are pleased to serve as your hosts here in the vibrant city of Toronto. This marks the third time our university has been selected to host this important and growing conference. I am happy to report that this year, more than 1,100 delegates from around the world are here in person and some 300 attendees are participating online, sharing research, taking part in special lectures, networking activities, development workshops and, perhaps most importantly, connecting. This conference will also feature CEA's second annual Embrace Day, offering an opportunity to address equity, diversity and inclusion in the profession – values that we at TMU strive to live and champion each day. Our commitment to these values is highlighted by the efforts of our Office of the Vice-President, Equity and Community Inclusion, which is focused on making EDI central to all teaching, research, learning, service and administrative functions and ensuring that everyone has the same access to opportunity and the support to achieve their ambitions.

Toronto Metropolitan University has a special mission to make a difference by advancing applied knowledge and research to address societal challenges. This mission is foundational to all we do. To this end, we have created a vibrant ecosystem for innovation supported by Zone Learning, a new model of experiential learning built to allow students to apply their degree coursework to real world startups, causes, companies, projects or ventures. The DMZ is a world-leading tech startup incubator with a proven track record of helping entrepreneurs build, launch, and scale highly impactful startups. The Brampton Venture Zone

by TMU is a purpose-driven, incubator launching early-stage technology startups in Brampton. It brings together key players in the local industry to build solutions for the greater economic and social impact of the local community.

I would like to acknowledge program Chair John W. Galbraith and my esteemed colleagues Professor Richard Chisik and Professor Brennan Thompson for creating such an impactful program, as well as everyone who has worked to make this event possible.

Mohamed Lachemi
President and Vice-Chancellor

Message de bienvenue du président et du vice-chancelier de la Toronto Metropolitan University:

Je suis ravi de vous accueillir à la 58e conférence annuelle de l'Association canadienne d'économique (ACE). L'Université métropolitaine de Toronto (UMT) et la Faculté des arts ont le plaisir de vous accueillir dans la ville dynamique de Toronto.

C'est la troisième fois que notre université est choisie pour accueillir cette conférence importante et en plein essor. Je suis heureux d'annoncer que, cette année, plus de 1 100 délégués du monde entier sont présents en personne et que quelque 300 participants sont en ligne, échangeant leurs recherches, assistant à des conférences spéciales, à des activités de réseautage, à des ateliers de développement et, peut-être plus important encore, tissant des liens entre eux.

Cette conférence comprendra également la deuxième journée annuelle « Embrace » de l'ACE, qui se voudra une occasion d'aborder les questions d'équité, de diversité et d'inclusion (EDI) dans la profession, des valeurs que nous nous efforçons d'incarner et de défendre chaque jour à l'UMT. Notre engagement en faveur de ces valeurs est mis en évidence par les efforts de notre bureau du vice-président de l'équité et de l'inclusion communautaire, qui s'affaire à placer l'EDI au cœur de toutes les fonctions d'enseignement, de recherche, d'apprentissage, de service et d'administration, et à veiller à ce que chacun ait le même accès aux possibilités et

le soutien nécessaire pour réaliser ses ambitions.

L'Université métropolitaine de Toronto a pour mission particulière de changer la donne en faisant progresser les connaissances appliquées et la recherche pour s'attaquer aux difficultés sociétales. Cette mission est à la base de tout ce que nous faisons. À cette fin, nous avons créé un écosystème dynamique pour l'innovation, soutenu par l'apprentissage par zone, un nouveau modèle d'apprentissage par l'expérience conçu pour permettre aux étudiants d'appliquer leur programmes d'études à des entreprises en démarrage, causes, entreprises ou projets du monde réel. DMZ, c'est un incubateur d'entreprises en démarrage du secteur de la technologie de premier plan qui a fait ses preuves en aidant les entrepreneurs à créer, à lancer et à développer des entreprises en démarrage à grande incidence. La Brampton Venture Zone de TMU est un incubateur d'entreprises en démarrage du secteur de la technologie qui en est à ses débuts à Brampton. L'incubateur réunit des acteurs clés de l'industrie locale pour créer des solutions ayant des retombées économiques et sociales importantes pour la communauté locale.

Je tiens à remercier le président du programme, John W. Galbraith, et mes estimés collègues, les professeurs Richard Chisik et Brennan Thompson, d'avoir créé un programme d'une telle envergure, ainsi que toutes les personnes qui ont œuvré à la réalisation de cette activité.
